

**Prof. (Dr.) S. D. Lokhande**  
**Principal**

Today's era has far more cutting edge innovations due to the advances in Science & Technology. The challenges we have to deal with because of the growth does not pertain only to the Technical field, it encompasses Social & Moral areas too. Along with Intelligence, we need awareness about our social and cultural responsibilities to overcome the above issues.

In the present scenario, Engineers have to possess multi-disciplinary knowledge to function in the society. Sinhgad College of Engineering have been instrumental in imparting Quality Education with the help of its state-of-the-art Infrastructure and dedicated Faculty members. Our success in the field of Research, Projects, Industry tie-ups, Scholarships, and Placements are well-known in the Academic circles.

I believe there is always scope for improvement in whatever we do. Every student is capable of coming up with original ideas in the projects and thesis they submit during their academic years in the college. I urge students to do every task assigned to them in a dedicated and inspired manner, only then will they be able to come up with unique, valuable and practical solutions to the concerns facing the Community.

Let us all work hard and fulfill our commitments to the Society.

Thanks.
